## BAGGING MACHINE/CUSHION FILLER

SINCE 1947

### OVERVIEW

ABM International, Inc. introduces the world's first zero maintenance bagging machine. The **ED-3339-2A** is ABM's heavy duty electro/pneumatic bagging and filling machine. ABM has virtually eliminated the pinch points and installed additional computer controlled safety features. The operator places the folded product or foam filling material on the stainless steel filling mouth. Then presses the foot pedal to actuate the compression cylinder, and slips the cover over the mouth. Next, the operator presses the ejection foot pedal, which ejects the filled bag or cushion into the operator's hands.

### FEATURES & BENEFITS

- ▶ The **ED-3339-2A Bagging Machine** is fabricated from heavy duty steel gussets and support members with an all aluminum extrusion modular design.
- ▶ A **Nema** enclosure and all stainless **SMC pneumatics** allow for maintenance-free operation.

## PRECISION ENGINEERED

- ▶ ABM's expert team of Engineers has spent many hours designing and testing the mechanisms utilized on the ED-3339-2A.
- ▶ Due to rigorous stress analysis, we've created the most advanced and efficient system available for packaging and filling.
